The FLUTETM

Where flexible ureteroscopy turns musical ...

The FLEXible Ureteroscopy Training & Evaluation Program

www.ainuindia.org

Are you ready to elevate your skills in flexible ureteroscopy (fURS)? The FLUTE program, an exclusive hands-on training initiative tailored for urologists, has garnered remarkable success over its 15 editions, having trained nearly 100 urologists to date. This program stands out as a beacon of professional development in the field of urology.

Participants have consistently provided encouraging and positive feedback, highlighting how the immersive hands-on training has refined their surgical techniques and equipped them with essential insights for performing fURS procedures. But what truly sets FLUTE apart? It's the unique opportunity for real-time practice and skill enhancement that only a hands-on format can offer.

We are both delighted and humbled by the decision made by Professor Michael Wong, Director of the Asian School of Urology (ASU), an educational arm of the Urological Association of Asia (UAA) to extend support to the FLUTE program. This initiative represents a pivotal step toward enhancing educational opportunities within the field of urology across Asia, aligning with ASU's mission to promote advanced learning and professional growth among urologists.

Join us in this transformative endeavor! Whether you are a seasoned practitioner or just beginning your career in urology, the FLUTE program promises to be an invaluable asset on your path to excellence. Don't miss out on this opportunity—let's shape the future of urological care together! For more information on registration and upcoming sessions, please visit our website or contact us directly. Your next step towards mastery awaits!

Third Saturday of Every Alternate Month - 2025
